Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1. Claims 15 and 16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 15 and 16 are directed to a program for executing processes corresponding to a method.

A computer program is merely a set of instructions capable of being executed by a computer and hence the computer program itself is not a process. Without a computer-readable medium needed to realize the computer program's functionality, the claims are treated as nonstatutory functional descriptive material.

Allowable Subject Matter and Reasons for Allowance

2. Claims 7-14 and 17 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

- 2a. The instant application discloses an electronic device. Prior art references show similar methods but fail to teach: "determining that an error exists if the data packet is not returned to the main control unit with a predetermined time; in the case that an error exists, generating a test signal via direct connections from the

main control unit each of the first and second sub-processing units; and transmitting a test packet from each of said sub-processing units via the second and third data buses to the main control unit in order to determine the location of said error", as in claims 7, 9, 11, 13, 17 along with the remaining limitations of the independent claims.

- 2b. Claims 8, 10, 12 and 14 are allowed as being dependent on claims 7, 9, 11 and 13 respectively.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
- Prasad et al. (US 6275491 B1) show testing and evaluation of experimental fast packet switch architectures.

Contact Information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vineeta S. Panwalkar whose telephone number is 571-272-8561.
